We have not investigated or otherwise verified the data provided. Accordingly, we do not express any opinion or offer any form of assurance regarding its accuracy and completeness. We assume no responsibility for any errors in the above information furnished by the Companies and their impact on the present exercise.
- 4.4. This report is issued on the understanding that the companies have drawn our attention to all the matters, which they are aware of concerning the financial position of the companies and any other matter, which may have an impact on our opinion on the share exchange ratio for the proposed scheme. We have no responsibility to update this report for events and circumstances occurring after the date of this report.
- 4.5. Our report is not, nor should it be construed as our opining or certifying the compliance of the proposed scheme with the provision of any law including Companies, Taxation and Capital Market related laws or as regards any legal implications or issues arising from such proposed scheme.
- 4.6. The information contained herein and our report is absolutely confidential. It is intended only for the sole use and information of the Companies, and only in connection with the proposed Amalgamation as aforesaid including for the purpose of obtaining requisite approvals. It is to be noted that any reproduction, copying or otherwise quoting of this report or any part thereof, other than in connection with the

proposed Amalgamation as aforesaid, can be done only with our prior permission in writing.

- 4.7. Our scope of work involves recommendation of entitlement ratio, however the decision to proceed with the Amalgamation as well as the acceptance of this entitlement depends on the directors of the respective companies.

**5. BASIS FOR DETERMINATION OF RATIO**

5.1. As informed earlier, GM Solutions holds 2,97,46,353 equity shares in R Systems. As per the Scheme, upon Amalgamation of GM Solutions into R Systems, the shareholders of GM Solutions would be entitled to the same number of shares of R Systems which they own on the Effective Date of the proposed Amalgamation indirectly through their holding in GM Solutions. Pursuant to the Amalgamation, there would be no change in the paid-up capital of R Systems. Considering that the same number of shares are being issued and there would be no impact on shareholding of other shareholders of R Systems, also their Interest remains unaffected, therefore we have thought fit not to undertake the valuation of shares of the Companies following any specific valuation methodology as there will be no impact on the determination of share entitlement ratio pursuant to the proposed Amalgamation.

5.2. We have been further informed by the management and captured in the Scheme as well that all costs, charges, taxes including duties, levies and all other expenses, if any, arising out of or incurred in connection with and implementing this Scheme and matters incidental thereto shall be borne by GM Solutions and / or its members. No cost, charges, taxes pertaining to the Scheme shall be borne by R Systems.

**6. RECOMMENDED RATIO**

6.1. Based on above, we recommend a share entitlement ratio as follows:

***"2,97,46,353 (Two Crore Ninety Seven Lakhs Forty Six Thousand Three Hundred and Fifty Three Only) fully paid up equity shares of the face value of Re. 1/- (Rupee One) of R Systems International Limited to be issued and allotted to the Equity Shareholders of GM Solutions Private Limited in the proportion of their respective equity shareholding in GM Solutions".***

4

**CA PRAVEEN KUMAR VERMA, FCA

6.2. We believe that the above ratio is fair and equitable considering that all the shareholders of GM Solutions will remain the beneficial owners in R Systems in the same proportion post Amalgamation, as they were holding in R Systems (directly and/or indirectly through GM Solutions) prior to the Amalgamation and that the interest of the other shareholders in R Systems remains unaffected.

## CONTEXT AND BACKGROUND

1. We understand that R Systems is listed on the National Stock Exchange of India Limited and BSE Limited. The proposed scheme of amalgamation provides for amalgamation of GM Solutions into R Systems in accordance with the provisions of sections 230 to 232 and other applicable provisions of the Companies Act, 2013 (hereinafter referred to as the "**Scheme**").
2. GM Solutions forms part of the promoter group of R Systems. It presently holds 2,97,46,353 equity shares constituting about 24% of total paid-up equity share capital of R Systems. Pursuant to the proposed amalgamation, shareholders of GM Solutions who are promoter and promoter group (and their relative) of R Systems ('**Promoters**') as well would directly hold the shares in R Systems which are currently held by shareholders of GM Solutions in the same proportion as they hold through GM Solutions.
3. The opinion expressed here is confidential and has been made in accordance with SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (hereinafter referred to as "listing regulations") read with SEBI Circular no. CFD/DIL3/CIR/2017/21 dated March 10, 2017, it should not be used, reproduced or circulated to any other person, in whole or in part, without the prior consent of Corporate Professionals Capital Private Limited, such consent will only be given after full consideration of the circumstance at the time. We are however aware that the conclusion in this report may be used for the purpose of disclosure to be made to the stock exchange/NCLT and notices to be dispatched to the shareholder and creditors for convening the meeting pursuant the directions of NCLT and we provide consent for the same. Please feel free to contact us in case you require any additional information or clarifications.
4. With reference to the above, Corporate Professionals Capital Private Limited has been appointed as Merchant Bankers by the management of R Systems / GM Solutions to provide the "Fairness Opinion" on the Share Entitlement Report issued by the Valuer.

## BRIEF ABOUT COMPANIES

### 1. R SYSTEMS INTERNATIONAL LIMITED

- a) R Systems is engaged in providing IT and BPO services. R Systems, was incorporated on 14 May 1993 and is a specialized IT Services & Solutions and IT-enabled services provider catering to a wide range of global customers. Its services and solutions extend across five major verticals which include Telecom & Digital Media, Banking & Finance, HealthCare, Manufacturing & Logistics, and Retail & E-Commerce.
- b) The equity shares of R Systems are presently listed on the National Stock Exchange of India Limited and BSE Limited.
- c) We have been informed that the Promoter and Promoter Group hold approximately 50.90% of equity share capital of R Systems as on June 30, 2017. It has been represented by the management that there is no change in the promoter and promoter group shareholding since then till date.

### 2. GM SOLUTIONS PRIVATE LIMITED

- a) GM Solutions is a private limited company and was incorporated on October 19, 2000. GM Solutions forms part of the promoter group of R Systems.
- b) GM Solutions holds 2,97,46,353 equity shares of INR 1 each fully paid up being approximately 24% of the total paid-up equity share capital of R Systems. The shares held by GM Solutions in R Systems have been classified as part of Promoter Group shareholding.

## KEY FACTS & CERTAIN EXTRACT OF THE SCHEME

GM Solutions forms part of the promoter group of R Systems. It presently holds 2,97,46,353 equity shares constituting about 24% of total paid-up equity share capital of R Systems.

Pursuant to the proposed amalgamation, individual shareholders of GM Solutions who are promoter and promoters group (and their relative) of R Systems ('**Promoters**') as well would directly hold the shares in R Systems which are currently held by shareholders of GM Solutions in the same proportion as they hold through GM Solutions.

There would be no change in the promoter shareholding of R Systems. The promoters would continue to hold the same percentage of shares in R Systems, pre and post the amalgamation of GM Solutions into R Systems.

## VALUER ANALYSIS

With reference to the Share Entitlement Report issued by "CA. Praveen Kumar Verma, Chartered Accountant", dated 20<sup>th</sup> September 2017, the valuer has thought fit not to undertake the valuation of shares of the Companies following any specific valuation methodology as there will be no impact on the determination of share entitlement ratio pursuant to the Proposed Amalgamation as–

- ✓ GM Solutions holds 2,97,46,353 equity shares in R Systems.
- ✓ Upon Proposed Amalgamation, the shareholders of GM Solutions would be entitled to the same number of shares of R Systems which they own on the Effective Date of the Proposed Amalgamation indirectly through their holding in GM Solutions.
- ✓ Pursuant to the Proposed Amalgamation, there would be no change in the paid -up capital of R Systems. Considering that the same number of shares are being issued and there would be no impact on shareholding of other shareholders of R Systems, also their Interest remains unaffected.

Based on the above reasoning the valuer has recommended the share entitlement ratio as follows

***"2,97,46,353 (Two Crore Ninety Seven Lakhs Forty Six Thousand Three Hundred and Fifty Three Only) fully paid up equity shares of the face value of Re. 1/- (Rupee One) of R Systems International Limited to be issued and allotted to the Equity Shareholders of GM Solutions Private Limited in the proportion of their respective equity shareholding in GM Solutions Private Limited".***

## CONCLUSION & OPINION

- The Proposed Amalgamation would not only lead to simplification of the shareholding structure and reduction of layering but also demonstrate the promoter group's direct commitment to and engagement with R Systems.
- In reference to the Share Entitlement Report issued by CA. Praveen Kumar Verma, Chartered Accountant dated 20<sup>th</sup> September 2017 which suggest that post Amalgamation there would be no change in the paid-up capital of R Systems. Considering that the same number of shares are being issued and there would be no impact on shareholding of other shareholders of R Systems, also their interest remains unaffected.
- Further considering the Share Entitlement Ratio proposed by valuer, it seems fair and equitable considering that all the shareholders of GM Solutions will remain the beneficial owners in R Systems in the same proportion post Amalgamation, as they were holding in R Systems (directly and/or indirectly through GM Solutions) prior to the Proposed Amalgamation and that the interest of the other shareholders in R Systems remains unaffected.

*"Subject to above read with the caveats as detailed later, we as a Merchant Banker hereby certify that pursuant to SEBI circular no.CFD/DIL3/CIR/2017/21 dated March 10, 2017, we have reviewed the valuation report of the Valuer pursuant to the scheme of Amalgamation and considered it to be fair and reasonable from the point of view of equity shareholders of R Systems."*

## **ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT**

**(Referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)**

### **Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of **R SYSTEMS INTERNATIONAL LIMITED** ("the Company") as of December 31, 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

#### **Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditor's Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

## Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at December 31, 2017, based on internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The accounting policies have been consistently applied by the Company and are consistent with those used in previous year.

Based on the nature of activities of the Company and the normal time between acquisition of assets and their realization in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

The Company continues to follow calendar year i.e. 1st day of January to 31st day of December as its financial year vide the Company Law Board approval dated November 18, 2015 under the proviso to Section 2(41) of the Companies Act, 2013.

The previous year financial statements were audited by erstwhile statutory auditor, M/s S.R. Batliboi & Associates LLP, Chartered accountants.

All figures are in Rupees except where expressly stated.

#### **2.1. Summary of significant accounting policies**

##### **(a) Use of estimates**

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make judgments, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting year end. These estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates.

##### **(b) Tangible fixed assets**

Tangible fixed assets are stated at cost less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

Gains or losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the assets and are recognised in the statement of profit and loss when the asset is derecognised.

Fixed assets under construction and cost of assets not ready to use before the year end, are disclosed as capital work-in-progress.

##### **(c) Depreciation on tangible fixed assets**

Depreciation on tangible assets including investment property is provided on the straight line method based on useful lives of respective assets as estimated by the management. The assets residual values and useful lives are reviewed at each financial year end or whenever there are indicators for review, and adjusted prospectively.

The management believes that depreciation rates currently used fairly reflect its estimate of the

## **R SYSTEMS INTERNATIONAL LIMITED**

### **Notes to the Standalone Financial Statements for the year ended December 31, 2017**

useful lives and residual values of fixed assets and are in align with Part C of Schedule II of the Companies Act 2013.

The estimated useful lives of the tangible fixed assets followed by the Company in preparing the financial statements are described as below:

<b><u>Category of tangible fixed assets</u></b>	<b><u>Estimated useful life</u></b>
Buildings	30 years
Land – leasehold	Lease period
Leasehold improvements	Lower of lease period or useful life
Plant and machinery - other than air conditioners	15 years
Air conditioners	5 years
Office Equipment (other than end user devices)	5 years
Computer hardware and network installations (other than end user devices)	6 years
End-user devices such as desktop, laptop, mobile phones etc.	3 years
Furniture and fittings	10 years
Vehicles	8 years
Electrical Installations	10 years

#### **(d) Impairment**

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and risks specific to the asset.

After impairment, tangible assets / intangibles are depreciated / amortised on the revised carrying amount over its remaining useful life.

#### **(e) Intangibles assets**

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and expenditure is reflected in the statement of profit and loss in the year in which the expenditure is incurred.

Intangible assets are amortised on a straight line basis over the estimated useful economic life and are assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortisation period and the amortisation method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortisation period is changed accordingly. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortisation method is changed to reflect the changed pattern. Such changes are accounted for in accordance with AS 5 Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies.

##### *Research and development costs*

Research costs are expensed as incurred. Development expenditure incurred on an individual project is recognised as an intangible asset when the company can demonstrate all the following:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale
- Its intention to complete the intangible asset
- Its ability to use or sell the intangible asset
- How the intangible asset will generate future economic benefits

- The availability of adequate resources to complete the development and to use or sell the intangible asset
- The ability to measure reliably the expenditure attributable to the intangible asset during development.

Following the initial recognition of the development expenditure as an intangible asset, the cost model is applied requiring the intangible asset to be carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the intangible asset begins when development is complete and the intangible asset is available for use. It is amortised on a straight line basis over the period of expected future benefit from the related project. Amortisation is recognised in the statement of profit and loss. During the period of development, the intangible asset is tested for impairment annually.

A summary of amortisation policies applied to the company's intangible assets are as below:

<b><u>Category of intangible fixed assets</u></b>	<b><u>Estimated useful life</u></b>
Computer software	Lower of license period or 3 years

**(f) Leases**

*Where the company is lessee*

Finance leases, which effectively transfer to the Company substantially all the risks and benefits incidental to ownership of the leased item, are capitalised at the lower of the fair value of lease property and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease payments are apportioned between the finance charges and reduction of the lease liability based on the implicit rate of return. Finance charges are recognised as finance cost in the statement of profit and loss. Lease management fees, legal charges and other initial direct costs are capitalised.

A leased asset is depreciated on a straight-line basis over the useful life of the asset. However, if there is no reasonable certainty that the company will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased term, are classified as operating leases. Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term.

*Where the company is the lessor*

Leases in which the company does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets comprising land or building which are subject to operating leases are included under non-current investments as investment property and are carried at cost less accumulated depreciation. Lease income on an operating lease is recognized in the statement of profit and loss on a straight-line basis over the lease term. Costs, including depreciation, are recognized as an expense in the statement of profit and loss.

**(g) Investments**

Investments, that are readily realizable and intended to be held for not more than 12 months from the date on which such investments are made, are classified as current investments. All other investments are classified as non-current investments. Current investments are carried at lower of cost and fair value determined on an individual investment basis. Non-current investments are carried at cost except for investment property which is carried at cost less accumulated depreciation. However, provision for diminution in value is made to recognise a decline other than temporary in the value of the non-current investments.

**(h) Revenue recognition**

Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company, there is no uncertainty as to the ultimate collection and the revenue can be reliably measured.

*Rendering of services*

Revenue from software development and maintenance services projects comprise income from

time-and-material and fixed-price contracts.

Revenue with respect to time and material basis is recognised when services are rendered. The same is calculated based on man-hours incurred for rendering services.

Fixed-price contracts vary in duration depending on the terms of the work being performed. Revenue from fixed price contracts (including maintenance and support contracts) is recognised using the percentage of completion method, when reasonable progress has been made on the milestones achieved as specified in the contracts. The stage of completion of project is determined by the proportion that contract efforts incurred for work performed up to the balance sheet date bear to the estimated total contract effort. Changes in contract performance, estimated profitability and final contract settlements may result in revision to costs and revenue and are recognised in the period in which the revisions are determined. If a loss is projected on any contract in process, the entire projected loss is recognised immediately.

Revenue from business process outsourcing services is derived from both time based and unit-price contracts. Revenue is recognized as the related services are performed in accordance with the specific terms of the contracts with the customers.

In terms of contracts, excess / shortfall of revenue over the billed as at the year end is carried in financial statement as unbilled revenue / unearned revenue separately.

#### *Sale of products*

Revenue from the sale of product (software and hardware) is recognised when the significant risks and rewards associated with the ownership is transferred to the buyer.

#### *Interest*

Revenue is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

### **(i) Foreign currency translation**

#### *Foreign currency transactions*

##### (i) Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

##### (ii) Conversion

Foreign currency monetary items are retranslated using the exchange rate prevailing at the reporting date. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

##### (iii) Exchange differences

Exchange differences arising on the settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expense in the Period/year in which they arise.

##### (iv) Forward exchange contracts not intended for trading or speculation purposes

The premium or discount arising at the inception of forward exchange contracts (except outstanding against firm commitments and highly probable forecast transaction) is amortised as expense or income over the life of the contract. Exchange differences on such contracts are recognised in the statement of profit and loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognised as income or as expense for the year.

##### (v) Translation of Integral foreign operation

The financial statements of an integral foreign operation are translated as if the transactions of the foreign operation have been those of the Company itself.

**(j) Employee benefits**

- (i) Employee benefits include provident fund, employee state insurance scheme, gratuity and compensated absences.
- (ii) The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include bonus and performance incentive which are expected to occur within twelve months after the end of the period in which the employee renders the related service.
- (iii) The Company's contribution to provident fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.
- (iv) Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation made at the end of each financial year on projected unit credit method. The gratuity plan is funded. The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation, as reduced by the fair value of scheme assets, if any.
- (v) Long term compensated absences are provided for based on actuarial valuation. The actuarial valuation is done as per projected unit credit method. The Company presents the entire leave as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for 12 months after the reporting date.
- (vi) Actuarial gains / losses are immediately taken to statement of profit and loss and are not deferred.

**(k) Income taxes**

Tax expense comprises of current and deferred tax.

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the relevant tax regulations applicable to the Company in India and foreign jurisdiction.

Deferred income tax reflects the impact of current year timing differences between taxable income and accounting income and reversal of timing differences of earlier years. Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised.

At each balance sheet date the Company re-assesses unrecognised deferred tax assets. It recognises the unrecognised deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The Company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain, that sufficient future taxable income will be available.

MAT credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified year. In the year in which the Minimum Alternate Tax (MAT) credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the statement of profit and loss and shown as MAT Credit Entitlement. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal income tax during the specified period.

**(l) Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs incurred in connection with the borrowing of funds.

**(m) Earnings per share**

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average numbers of equity shares outstanding during the year are adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders, share split and reverse share split (consolidation of shares).

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented.

**(n) Provision**

A provision is recognised when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on the best estimate required to settle the obligation at each Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the management's current estimates.

**(o) Segment reporting**

*Identification of segments:*

The Company's operating businesses are organised and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of geographical segments is based on the areas in which the major customers of the Company operate and / or the area in which the assets are located.

*Inter segment transfers:*

The Company generally accounts for inter segment sales and transfers as if the sales or transfers were to third parties at current market prices.

*Allocation of common costs:*

Common allocable costs are allocated to each segment according to the relative contribution of each segment to the total common costs.

*Unallocated items:*

The corporate and other segment includes general corporate income and expense items which are not allocated to any business segment.

*Segment Policies:*

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

**(p) Accounting for derivatives (Also refer note 36)**

The Company uses foreign exchange forward contracts (derivative financial instrument) to hedge its exposure to movements in foreign exchange rates against firm commitment or highly probable forecast transactions. The use of these foreign exchange forward contracts reduces the risk or cost to the Company and the Company does not use the foreign exchange forward contracts or options for trading or speculation purposes.

Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value on a mark-to-market basis at each balance sheet date. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in fair value on derivatives during the year that do not qualify for hedge accounting and the ineffective portion of an effective hedge, are taken directly to the statement of profit and loss.

The mark-to-market is the difference between the forward exchange rate and the contract rate. The forward exchange rate is referenced to current forward exchange rates for contracts with similar maturity profiles.

For the purpose of hedge accounting, hedges are classified as:

- fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment (except for foreign currency risk); or
- cash flow hedges when hedging exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges which meet the strict criteria for hedge accounting are accounted for as follows:

*Fair value hedges*

The change in the fair value of a hedging derivative is recognised in the statement of profit and loss. The change in the fair value of the hedged item attributable to the risk hedged is recorded as a part of the carrying value of the hedged item and is also recognised in the statement of profit and loss.

*Cash flow hedges*

The effective portion of the gain or loss on the hedging instrument is recognised directly in equity, while any ineffective portion is recognised immediately in the statement of profit and loss. Amounts taken to equity are transferred to the statement of profit and loss when the hedged transaction

## **R SYSTEMS INTERNATIONAL LIMITED**

### **Notes to the Standalone Financial Statements for the year ended December 31, 2017**

affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs.

If the forecast transaction or firm commitment is no longer expected to occur, amounts previously recognised in equity are transferred to the statement of profit and loss. If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover, or if its designation as a hedge is revoked, amounts previously recognised in equity remain in equity until the forecast transaction or firm commitment occurs.

**(q) Cash and cash equivalents**

Cash and cash equivalents for the purpose of cash flow statement on balance sheet date comprise cash at bank and in hand and short-term investments with an original maturity of three months or less.

**(r) Cash flow statement**

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

**(s) Employee stock compensation cost**

Measurement and disclosure of the employee share-based payment plans is done in accordance with SEBI (Employee Stock Option Scheme and Employee Stock Purchase Scheme) Guidelines, 1999 and the Guidance Note on Accounting for Employee Share-based Payments, issued by the Institute of Chartered Accountants of India. The Company measures compensation cost relating to employee stock options using the intrinsic value method. Compensation expense is amortised over the vesting period of the option on a straight line basis.

**(t) Contingent liabilities**

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

### Notes to the Standalone Financial Statements for the year ended December 31, 2017

#### 32. (a) R Systems International Limited Employees Stock Option Plan – Year 2001 ('the plan')

Indus Software Private Limited ('Indus') had outstanding options aggregating 21,967 equity shares as on March 31, 2002, to be issued to the eligible employees under the R Systems International Limited Employees Stock Option Plan – Year 2001 under various vesting periods as specified in the said Plan, duly approved by the erstwhile shareholders. Indus had established "R Systems Employees Welfare Trust" ('the R Systems Trust') (formerly known as Indus Software Employees Welfare Trust) to administer the plan, as approved by the members, for the benefits of the Company's employees and had provided an interest free loan of Rs. 3,382,792. Consequently, Indus had allotted 21,967 equity shares of Rs. 10 each at a premium of Rs. 144 per equity share to the R Systems Trust to be further issued to the Indus' eligible employees on the exercise of the underlying options granted to them.

As a result of the merger of Indus with the Company, all employees had surrendered their options in favour of the R Systems Trust to enable them to obtain options for shares in R Systems International Limited after the merger. Also, the Company had issued 206,822 equity shares of Rs. 2 each at a premium of Rs. 113.42 per share to the R Systems Trust in exchange of 21,967 equity shares of Indus, apropos to the agreed swap ratio. During the earlier years out of the said 206,822 shares 22,079 shares were issued to the employees on exercise of options.

The Company had consolidated each of its five equity shares of Rs. 2 each into one equity share of Rs. 10 each on January 30, 2006 and then issued 1:1 bonus share to each of the then existing shareholder by utilisation of Securities Premium Account in terms of the provisions of Section 78 of the Companies Act, 1956 and further sub-division of each of the equity shares of Rs. 10 each into 10 equity shares of Re. 1 each as per record date of February 28, 2014, consequently the total number of shares issued are now 738,980 equity shares of Re. 1 each. Accordingly an amount of Rs. 738,980 and Rs. 2,282,728 is shown as deduction from Issued, subscribed and paid-up capital and Securities Premium Account respectively as suggested by the "Guidance Note on Accounting for Employee Share-based Payments" issued by The Institute of Chartered Accountants of India.
